

RAPPAHANNOCK ELECTRIC COOPERATIVE
AGGREGATED NET METERING
AFFIDAVIT FOR NET ENERGY METERING RIDER

Rappahannock Electric Cooperative's ("REC") members requesting service for agricultural net metering as defined in Chapter 315 of Title 20 the Virginia Administrative Code shall provide a signed affidavit certifying all applicability requirements have been met to the best of the member's knowledge and belief as of the date of the affidavit.

An Agricultural Net Metering Customer will be served on a rate schedule determined by the Cooperative to be available, applicable, and appropriate to the characteristics of the totalized load, as if the energy consumption and demand had been measured by a single meter at a single location. REC may require an applicant for agricultural net metering to provide deeds, plats, leases, or other evidence satisfactory to the Cooperative to reasonably demonstrate that the meters the applicant desires to aggregate are (1) on the same or contiguous sites and (2) that the customer uses the affected sites for its agricultural business.

APPLICABILITY

"Agricultural business" means any sole proprietorship, corporation, partnership, electing small business (Subchapter S) corporation, or limited liability company engaged primarily in the production and sale of plants and animals, products collected from plants and animals, or plant and animal services that are useful to the public.

"Agricultural net metering customer" means a customer that operates an electrical generating facility consisting of one or more agricultural renewable fuel generators having an aggregate generation capacity of not more than 500 kilowatts as part of an agricultural business under a net metering service arrangement. An agricultural net metering customer may be served by multiple meters of one utility that are located at separate but contiguous sites and that may be aggregated into one account. This account shall be served under the appropriate tariff.

"Agricultural renewable fuel generator" or "agricultural renewable fuel generating facility" means one or more electrical generators that:

1. Use as their sole energy source solar power, wind power, or aerobic or anaerobic digester gas;
2. The agricultural net metering customer owns and operates, or has contracted with other persons to own or operate, or both;
3. Are located on land owned or controlled by the agricultural business;
4. Are connected to the agricultural net metering customer's wiring on the agricultural net metering customer's side of the agricultural net metering customer's interconnection with the distributor;
5. Are interconnected and operated in parallel with an electric company's distribution facilities; and
6. Are used primarily to provide energy to metered accounts of the agricultural business.

Affidavit for Agricultural Net Metering

AFFIDAVIT

I declare under penalty of perjury that the foregoing is true and correct. My account meets the minimum necessary qualifications set forth in Section 20 VAC 5-315-20 of the Virginia Administrative Code and per § 56-594. B. of the Code of Virginia, the electricity from my agricultural renewable fuel generator(s) is used primarily to provide energy to metered accounts of the agricultural business.
